

Software Engineer proficient in **C++**, **C#**, and **Python**, specializing in high-performance architectures and full-lifecycle tool development. Adept at transforming complex requirements into scalable, maintainable software solutions.

Technical Skills

Programming Languages:

C++
C#
Python
HTML, CSS, JS + React

Engines/Tools:

Unreal Engine
Unity
Rider, VSC
Github

Design:

Basic UI/UX
Figma

Soft Skills

Team Leadership
Problem solving skills
Organizational Talent

Languages

German Native Speaker

English Professional Proficiency

Swedish Upper Intermediate

EXPERIENCE

Software Engineer / Full-Stack Developer | Moon Flame Games 2023/08– Present

Ramsjö, Sweden

Used languages: **C++**, **HTML**, **CSS**

- **Full Lifecycle Development:** Managed end-to-end development from initial architecture to polished, production-ready deliverables.
- **Performance Engineering:** Utilized CPU and GPU profiling tools to identify bottlenecks and ensure high-performance execution.
- **Tool Development:** Built custom editor extensions to automate and streamline content implementation workflows.
- **Team Leadership & Production:** Led a team of art interns, managing production schedules and organizational tasks using SCRUM principles.

Programmer & Technical Designer | Studio Northshade 2024/10 – 2026/01

Gothenburg, Sweden, Remote

Used languages: **C++**, **visual programming**

- **Performance Engineering:** Improved the performance of procedural runtime generation systems by 30%.
- **Tool Development:** Built designer-friendly tools for complex data handling and environment manipulation.
- **System Integration:** Developed core application systems including user interfaces and interactive object frameworks.

Technical Lead | Glimeria Studios 2025/01 – 2025/06

Stockholm, Sweden, Remote

Used languages: **C++**, **visual programming**

- **Prototype Architecture:** Built a full-scale prototype architecture for multiplayer synchronization from the ground up.
- **Event Systems:** Implemented a robust, designer-friendly event system utilizing the Command Pattern.

Full-Stack C# Developer & Systems Architect 2025/01 – 2025/06

- **System Architecture:** Architected and implemented modular software systems using C# and Unity.
- **Data Management:** Engineered robust serialization systems for player data, world states, and complex inventory systems using JSON.
- **UI/UX Frameworks:** Built custom, responsive user interface systems and interactive toolsets to improve user experience and streamline internal workflows.

Hobbies

Playing & developing games

Cats

Hiking

Photographing

EDUCATION

The Indie Quest

2022/01 – 2023/06

Spelkollektivet, Väckelsång, Sweden

Focus on skill improvements in Unity, C# and basics of Art (2D, 3D)

Game Development, BS

2018/11 – 2021/03

Wilhelm-Büchner-Hochschule, Darmstadt, Germany
