Summary

Full-stack developer enrolled in Lexicon's Full-stack Software Developer Java program, building web applications with React and Node.js, plus Java backends in coursework. Uses AI tools such as GitHub Copilot and Claude Code to speed up development. Brings 5+ years of software engineering from game development in C++ and C#: system architecture, performance optimization, internal tooling, and leading small remote teams with Scrum. Comfortable taking projects from concept to polished, publicly available demos.
Available for LIA from 21 April to 15 July 2027.

Technical Skills

Programming languages:	Java, C++, C#, Python, JavaScript, TypeScript, HTML, CSS
Web:	React, Next.js, Tailwind, Node.js
Databases:	MongoDB, PostgreSQL
Game Engines:	Unreal Engine (C++, Blueprints), Unity
Tools:	Git/GitHub, IntelliJ, Rider, VS Code, Figma, GitHub Copilot, Claude Code
Workflows:	Jira, Confluence, Trello, ClickUp, Scrum

Experience

Founder and Developer

Moon Flame Games | Ramsjö, Sweden (Väckelsång until 02/2023) *2021-01 – Present*

Full-stack Web Developer *2026-05 – Present*

Moon Flame Games

Tech: **HTML, CSS, JavaScript (React, Node.js, Next.js, Tailwind), MongoDB, Java, Python**

Selected projects:

- **Store Inventory Management System:** Replaced a local store's paper-based delivery acceptance process with a React frontend and Python backend.
- **Role Play Tavern Application:** Web application built with a React frontend, a Node.js API and a MongoDB database, where users write role-plays together.

Game and Software Engineer *2022-07 – Present*

Moon Flame Games

Tech: **C++, Blueprints in Unreal Engine**

- **Full Lifecycle Development**: Managed end-to-end development from initial architecture to polished, production-ready deliverables.
- **Performance Engineering:** Used CPU and GPU profiling tools to identify bottlenecks and optimize runtime performance.
- **Tool Development:** Built custom editor extensions to automate and streamline content implementation workflows.
- **Team Leadership & Production**: Led a team of 3 art interns, managing production schedules and organizational tasks using Scrum principles.

Selected projects:

- **Hexavale** | Strategy puzzle game with hexagonal tiles *(https://store.steampowered.com/app/4083690/Hexavale_Demo/)*
- **Magical Harvest** | 3D fantasy farming role-playing game *(https://store.steampowered.com/app/1906970/Magical_Harvest/)*

Game Programmer

2021-01 – 2022-06

Moon Flame Games

Tech: **C# in Unity**

Work across several small Unity game projects

- **System Architecture:** Architected and implemented modular software systems using C# and Unity.
- **Data Management:** Engineered robust serialization systems for player data, world states, and complex inventory systems using JSON.
- **UI/UX Frameworks:** Built custom, responsive user interface systems and interactive toolsets to improve user experience and streamline internal workflows.

Game Programmer & Technical Designer

Studio Northshade | Gothenburg, Sweden, Remote, part time

2024-10 – 2026-01

Tech: **C++, Blueprints in Unreal Engine**

- **Performance Engineering:** Improved the performance of procedural runtime generation systems by 30%.
- **Tool Development:** Built designer-friendly tools for complex data handling and environment manipulation.
- **System Integration:** Developed core application systems including user interfaces and interactive object frameworks.

Technical Lead & Programmer

Glimeria Studios | Stockholm, Sweden, Remote, part time

2025-01 – 2025-06

Tech: **C++, Blueprints in Unreal Engine**

- **Prototype Architecture:** Built a full-scale prototype architecture for multiplayer synchronization from the ground up.
- **Event Systems:** Implemented a robust, designer-friendly event system utilizing the Command Pattern.

Education

Full-stack Software Developer Java

2026-09 – 2027-07 (exp.)

Lexicon, Växjö, Sweden

The Indie Quest

2022-01 – 2023-06

Spelkollektivet, Väckelsång, Sweden

Focus on skill improvements in Unity, C# and basics of Art (2D, 3D)

BSc Game Development

2018-11 – 2021-03

Wilhelm-Büchner-Hochschule, Darmstadt, Germany

Languages and Interests

Languages: German (native), English (fluent), Swedish (upper intermediate)

Interests: Game development, photography, diamond painting
